Baran Dilber Özet

Baran was born on August 20, 1978 and has a BSc degree in Molecular Biology and an MS degree in Biomedical Engineering from Bogazici University. He founded Plus Tasarim, a web design company in 1999 while he was a student. Plus Tasarim was funded by T.E.B on 2000 and became Plus V.2, one of the most successful internet agencies in Turkey at the time. Between 2003 and 2005, while working for his masters degree, Baran concentrated on EKGNET, a telemedicine project for monitoring cardiac patients over the internet. This project was sponsored by Ericsson. EKGNET working prototype was finished in 2005. In 2006, Baran started working at Mynet as Software Development Manager, and was promoted to Business Unit Manager in 6 months. He was responsible for managing the Business unit for Mynet's social networking platform, Eksenim. He held this position until late 2008. After quitting his full time job at Mynet to pursue his PhD., he continued to work as a Strategy Consultant for Mynet.
